This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE Publisher begs to direct attention to some additions made in this SUPPLEMENT. In former editions of the London Catalogue all the works published in Series, such as Bohn's Standard Library, Library of Anglo-Catholic Theology, Library of Useful Knowledge, Lardner's Cyclopædia, Murray's Home Library, &c., &c., have been inserted under the title of the Series only. They are now also arranged in the Supplement under the author's name, title, &c., in the regular alphabet. By this plan, the difficulty of persons remembering in which Series a particular work has been published is done away with, as it is now twice catalogued.

A CLASSIFIED INDEX is appended to this volume, uniform with the "BIBLIOTHECA LONDINENSIS, or Classified Index to the London Catalogue of Books, 1814-46."

NOTICE.

THE Words in *Italic* indicate the first word of the line in the General Catalogue of Books. When there is no Italic in the line, the first word in the CLASSIFIED INDEX is the same as in the Catalogue.

The Cross References in the work, when printed in SMALL CAPITALS, point to a different division of classification; but when printed in the usual manner, they apply to another part of the same division or alphabet.

The General Table of Reference is placed at the end of the book.

Bibliotheca Londinensis.

A CLASSIFIED INDEX to the LONDON CATALOGUE OF BOOKS, 1814—46, uniform with the accompanying Index, may still be had of all Booksellers.

"THE 'BIBLIOTHECA LONDINENSIS' is a re-distribution of the matter in the 'LONDON CATALOGUE OF BOOKS,' whereby the original feature of classification is carried out to the utmost, with a nicety of division and selection, giving it an air of absolute novelty. The Indices are Forty-eight in number, and the student possesses a range of catalogues in which all the distinct branches of Literature are grouped under their respective specialties, such as Archæology, Art, Divinity, Education, Fiction, Law, Poetry, Science, Trade, &c., briefly but clearly disposed in columns, the titles of the books establishing the alphabet, and the author's name following in brackets. *The* 'BIBLIOTHECA' *addresses itself to the more general public, and we therefore commend it to the notice of all Librarians—as well as to those interested in the progress and fruit of literary acquirements—as a carefully compiled and skilfully adjusted register of the products of English learning and imagination since the peace.*"—MORNING HERALD.
